Career Objective

Motivated Web Developer and Cybersecurity Analyst SOC L1 with proven experience in front-end, back-end, cybersecurity, and data analysis. Seeking to apply my expertise to develop secure, scalable, and user-centric web applications that drive innovation, solve real-world problems, and strengthen organizational security.

Education

Bachelor's degree in software engineering, University of Hail

2019/05-2024/06

Experience

IT specialist– King Salman Hospital, Hail

2023/07-2024/01

Assisted in securing the hospital's IT infrastructure against cyber threats while providing technical support to staff and the call center. Conducted data analysis and generated reports using Python and Excel, managed Linux systems, and contributed to optimizing overall IT operations.
